

## the upholstered pillow pod

### benefits

The pod combines the aesthetic appeal of an iconic design with an industrial strength plastic frame. This combination creates a piece of furniture that is extremely comfortable and durable. The cradle can be upholstered in a variety of hard-wearing easycare materials as to can the cushion and pillows.

### construction

The cradle is manufactured from high density re-cycled polyethylene and this creates a solid frame that can be easily upholstered.

The base cushion and the pillows are both manufactured to exacting specifications.

The wooden feet are attached to metal plates that are bolted onto the base of the cradle.

All of our pods are manufactured in North Carolina.

### colour and fabric options

It is really up to the designer, specifier or home-owner to create the pod they want. We offer a blank canvas and we leave the rest up to the customer. Alternatively we offer a selection of leathers and micro-velvet fabrics that we offer as "standards".

### dimensions

Width 40" x Depth 40" x Height 28".

### delivery

Please contact us for the current delivery schedule.
